It doesn't include the incremental updates that Photoshop has received, so it doesn't have a feature that images can be automatically arranged for easier viewing. The program also doesn't have the ability to edit videos directly. It does, however, allow the skills to be shared via the new Sharing for Review feature, which allows you to immediately share the file with anyone who is logged in to the program. This will be a great tool for those who want to be able to give feedback to a photographer.
